

See diagram for corresponding ports and module slots.

e.g.  
The module inserted at Slot A corresponds to Ports 1 and 2.

The module inserted at Slot B corresponds to Ports 3 and 4.

#### ► OPTIONAL – INSTALL UP TO 6 REMORA™ EXPANSION CARDS

##### Attach additional Remora card(s) using a backplane.

It is ideal to put the Remora(s) to the right of the main card, so that the main card always contains port 1. However, if space is a concern, either side is appropriate.

The lowest number port on the backplane corresponds to port number 1 in the stack. (e.g., JP6 on a 4-connector backplane.)

*Recommended Configuration Only*
